

### Main class/struct - Model

#### Methods:

1. loadArch - loading JSON architecture file
2. loadWeights - loading h5 weights file

#### Members:

1. **<class Architecture>**

### Main class/struct - Architecture

#### Members:

1. vector of **<class Layer>**

### Main class/struct - Layer

#### Members:

1. LayerType - Conv2D/Dense
2. weight dimension
3. weight values
4. bias dimension
5. bias values
- ...
